PROFESSIONAL SUMMARY

Experienced Java Full Stack Developer with over 5y 10m+ years of expertise in overseeing the Software Development Life Cycle. Proficient in analysis, design, execution, and maintenance, delivering high-quality, cost-effective applications. Skilled in coding, testing, and enhancing organizational efficiency.

EDUCATION

B.Tech Computer Science , GVP College for Degree and PG Courses	2016-2020 First Class
Intermediate(MPC) , Narayana Junior College	2015 - 2016 92.5%
SSC , Amar Concept School	2013 - 2014 9.2

SKILLS

Technical Skills	C++, Java, Python, SQL, Spring Boot, Microservices, Angular, UI and Spring Batch Regression Testing, Playwright Automation
Tools	Eclipse, VS Code, WinSCP, SOAP UI, GIT, SonarQube, Snyk, Squirrel SQL, Tortoise Git
Soft Skills	Communication, Teamwork, Time management, Leadership, Collaboration, Attention to Detail.

EXPERIENCE

Senior Associate, Product Development Team Acuiti Labs (I) Pvt. Ltd.	27-02-2025 - Present <i>Hyderabad, Telangana</i>
--	---

- Projects:
 1. Q2C Customer Portal (Quote-to-Cash) – FIAR, SAP BRIM and SAP Subscription Billing (XaaS)
 2. AI SmartMatch (AI-powered intelligent matching platform)
- Implemented complex UI pages (dispute management, admin, billing) with lazy load modules and reusable components.
- Implmented robust attachment upload/download flow supporting base64 Data-URLs, ArrayBuffer fallback, MIME Detection and Blob downloads.
- UX Improvements: Added modal dialogs, loading spinners, clear error messages, and datae formatting using DatePipe.
- Integrated with shared services and central state (e.g., SharedService ,EnvironmentService) and worked in an enterprise micro-frontend environment.
- Consumed REST APIs via HttpClient with environment-aware base URLs and error/loading states.
- Developed and maintained multiple Spring Boot services (e.g., Payment, Notification, Agreement)
- Managed routing through API Gateway and standardized API contracts.
- Managed builds and dependencies with Maven
- I built email-based workflow Functionalities in AI SmartMatch to handle user replies and initiate transaction and payment processing. Integrated LLM-driven content generation via bedrock-client.py to produce dynamic personalized email bodies and subject lines.
- E2E Automation, Created PlayWright test suites for critical user flows to automate regression testing. Generated HTML test reports.

Systems Engineer Tata Consultancy Services	14-11-2022 - 26-02-2025 <i>Hyderabad, Telangana</i>
--	--

- Project: DMV, BOB, AZSR2226 Processing (State Farm Insurance):

- Experienced in Agile Frameworks and Software Development Life Cycle, ensuring efficient project delivery.
- Extensive hands-on experience in system design, application development, testing, and ensuring operational stability.
- Proficient in front-end technologies like HTML, CSS, and JavaScript, including Angular.
- Familiarity with microservice architecture, adept at building modular applications.
- Experience with Splunk for log monitoring and analysis.
- Implemented robust functionality in a Spring Boot application to efficiently manage the retrieval and transmission of records.
- Spearheaded the processing of intricate state files containing detailed insurance information, incorporating client-specific code modifications for enhanced customization.
- Consistently applying innovation to technical solutions, contributing to improved business outcomes.
- Ability to adapt and apply learnings across various business domains, driving innovation and efficiency.

Senior Project Engineer

28-09-2020 to 12-11-2022

Wipro

Hyderabad, Telangana

- Project: CFBG & CBZG (Wells Fargo India Solutions Pvt Ltd):
- Designing and building scalable and robust systems with Java to drive ongoing enhancements for product teams.
- Strong adherence to OOPs Principles, Exception handling, and Generics usage for maintaining clean, reusable code.
- Proficient in version control systems like Git for collaborative development.
- Experienced in Microsoft Office tools for documentation and reporting.
- Worked on build tools such as Maven for streamlined development processes.
- Migrated JDK8 to JDK 11
- Introduced New Health Check Point (Spring Actuator Dependency)
- Integrated Ping Federate for User Authentication and Single Sign-On
